

HOW TO PREPARE TO IMPLEMENT THE KWHOTEL BOOKING ENGINE?

IMPORTANT NOTE: KWHotel Booking Engine requires a 0.46 update to be installed first. Please contact us at support@kwhotel.com to schedule an update date.

Before KWHotel Booking Engine can be implemented at your website, the following steps must be taken:

STEP 1: CREATE THE ROOM GROUPS

Room group creation is explained here: [HOW TO CREATE ROOM GROUPS?](#)

Attention! There is no need to set up the prices during this step.

STEP 2: CREATE YOUR ROOM BASE

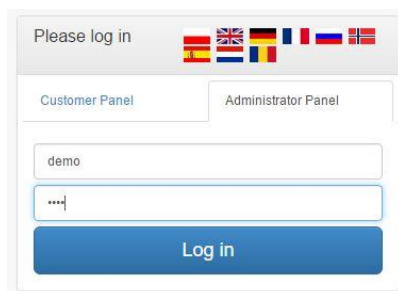

This step is explained here: [HOW TO CREATE ROOMS?](#)

Attention! There is no need to set up the prices during this step.

STEP 3: CREATE THE RATE PLANS

Rate plans are explained in detail here: [HOW TO CREATE RATE PLANS?](#)

STEP 4: PREPARE IMAGES AT [HTTP://WWW.PANEL.KWHOTEL.PL](http://www.panel.kwhotel.pl)

The screenshot shows the login interface for the KWHotel administrator panel. At the top, it says "Please log in" and displays several national flags. Below this, there are two tabs: "Customer Panel" and "Administrator Panel". The "Administrator Panel" tab is selected. There are two input fields: the first contains the text "demo" and the second contains a masked password "****". A blue "Log in" button is positioned at the bottom of the form.

First log to the administrator panel at <http://www.panel.kwhotel.pl>

then proceed to the ROOMS tab and add the room groups images.

You can also add images of your rate plans but this is not obligatory.

Recommended images size: 800px x 600px
