

INABILITY TO PRINT DOCUMENTS

You will learn:

1. How to react when you are unable to print a document

1. How to fix it?

If you issue a document such as invoice or bill and an error occurs when you click the "Save" button – this most likely means you do not have the ReportViewer libraries installed.

This can be fixed by downloading and installing the following libraries:

ReportViewer 2005 (click the link below to download the installer)

<https://download.microsoft.com/download/9/8/d/98d5fe84-60ad-4d40-bc25-5f60b9f21a11/ReportViewer.exe>

ReportViewer 2008 (click the link below to download the installer)

<https://download.microsoft.com/download/2/d/8/2d889b35-c4db-49c6-ae19-e5a0c7c2b24d/ReportViewer.exe>

Having installed both libraries, restart the computer and try issuing the document again.
